## sparkle additive

Seaweed with Sparkle Additive

Elevate your PIGMENT flooring projects with our Sparkle Additive.

This color-less pearlescent additive enhances the metallic look of PIGMENT floors. Add a small amount for a slight sparkle or a larger amount for a high-impact glitter effect.

## color-shift

Color-shift PIGMENT adds a new dimension to resinous flooring projects. These pearlescent pigments create unique optical illusions depending on the angles of viewing and light refraction.

Tamarin  
P7010

Betta  
P7020

Macaw  
P7030

Toucan  
P7040

Tetra  
P7050

**PIGMENT** is composed of mica nano-particles coated with various organic and inorganic pigments to create pearlescent and iridescent effects that mimic the natural look of stone and rock formations.

These unique pigments are designed to be field blended with a 100% solids clear epoxy binder. When the metallic particles are mixed with epoxy they give the coating a shine that reflects light and creates an eye-catching, dramatic color.

For best results, a clear topcoat is recommended to fully seal the PIGMENT and provide a durable wearing surface.

Features	Benefits
DURABLE	Resinous flooring systems provide superior chemical and abrasion resistance over pre-engineered floors.
DECORATIVE	PIGMENT enhances high-performance flooring by adding custom color and texture to complement any environment.
ECONOMICAL	PIGMENT resinous flooring systems provide a cost effective alternative to pre-engineered floors.
HYGIENIC	Resinous flooring systems are wax free and easy to upkeep and clean with just soap and water.
SEAMLESS	Resinous flooring creates a seamless, flowing surface that won't collect dirt, moisture, or germs.
FLEXIBLE	Resinous flooring systems provide a flexible surface that deadens the noise of foot traffic and carts.
RENEWABLE	After years of use, efficiently revitalize your resinous floor by sanding the surface and applying a new topcoat.

DISCLAIMER: The colors shown in this catalog may not be exact due to printing process limitations. For absolute color fidelity, colors should always be selected from physical samples.
